--	---	---	--

Parameter	Detail
Company	ArcWealth Pte. Ltd.
Sector	Wealthtech and Private Banking Infrastructure
Stage	Series A
Jurisdiction	Singapore (MAS compliant)
ARR at IC Date	USD 1.8M (12 contracted clients)
Gross Margin	68%, structural target 78 to 82% at scale
Monthly Churn	0.8% (single channel-sourced client)
Team	22 staff, co-founders from DBS Private Bank and Credit Suisse Singapore
IC Recommendation	Approve, unanimous

The Problem ArcWealth Solves

Asia-Pacific private banking RMs operate across multiple custodians, currencies, and languages. No incumbent system consolidates this into RM-ready client reporting without expensive customization built for Western market conventions.

Pain Point	Current State	ArcWealth Solution
Multi-custodian data	4 to 6 hours manual consolidation per client review cycle	Automated real-time aggregation across all custodians
Multi-currency reporting	FX conversion errors in manually assembled reports	Native multi-currency engine with live FX rates embedded
Multi-language output	English-only reports sent to Mandarin and Bahasa-speaking clients	Client-facing output in six languages at contract launch
Regulatory compliance	Compliance review adds 2 to 3 days to every report cycle	MAS and SFC compliant by design, embedded in report output

Incumbent providers were built for European or North American conventions. The Asia-Pacific custodian integration layer requires 12 to 18 months for a well-resourced competitor to rebuild. ArcWealth has it built and contracted with 12 institutions.

Product, Traction, and Unit Economics

USD 1.8M ARR 12 contracted institutions	118% Net Revenue Retention Expand and renew	68% Gross Margin 78 to 82% at scale	3.6 months CAC Payback Against USD 150K ACV
--	--	--	--

Metric	Detail
Revenue model	Annual SaaS contracts. Average contract value USD 150K per institution per year.
Revenue recognition	Subscription revenue recognized ratably over contract term. Setup fees recognized over implementation period.
Cohort performance	Four cohorts with 12 or more months of history show zero churn and 23% average contract value expansion at renewal. NRR of 118% confirms existing clients are expanding, not contracting.
Gross margin trajectory	Current 68% reflects partially amortized custodian integration costs. Structural margin of 78 to 82% reached as integration costs amortize across a larger client base.

Founding Team

Role	Background	Relevance
CEO	12 years at DBS Private Bank Singapore. Most recently Head of RM Analytics.	Built and used the fragmented reporting tools ArcWealth replaces. First client closed in 6 months versus the typical 9-month cycle through existing institutional relationships.
COO	8 years at Credit Suisse Singapore Private Banking Operations.	Direct operational experience in custodian integration and client reporting workflow. Manages the full implementation pipeline.
CTO	6 years at a Singapore-based financial data infrastructure company.	Built the multi-custodian data aggregation architecture. Owns the core technical differentiation that competitors require 12 to 18 months to replicate.

Team stability: 18 of 22 staff retained since or within six months of founding. Four departures were two junior engineers who moved to hyperscalers and two business development staff replaced with more senior hires. No loss of institutional knowledge. ARR target of USD 1.5M for the first 18 months was achieved at month 16.

Market Size and Competitive Position

Segment	Institutions	Avg. Annual Spend	TAM
Asia-Pacific private banks above USD 5B AUM (Singapore, Hong Kong, Japan, Australia)	180	USD 300K	USD 54M
Commercial bank private banking (Indonesia, Malaysia, Thailand)	120	USD 120K	USD 14M
Adjacent segments: onboarding workflow, regulatory reporting, client communication	Same base	Est. USD 200K additional	USD 430M+

Competitor	Origin	Gap versus ArcWealth
Incumbent A	European	No Asia-Pacific multi-custodian integration. 12 to 18 months required to rebuild. No MAS data residency compliance.
Incumbent B	North American	English-only output. No multi-currency native engine. No SFC-compliant architecture for Hong Kong clients.
Incumbent C	Singapore legacy	Monolithic architecture, no SaaS pricing model. Average implementation 9 months. No multi-language output capability.

Financial Position and Growth Assumptions

Metric	At Series A Close	Year 1 Post-Close	Year 2 Post-Close
ARR	USD 1.8M	USD 3.2M (80% growth assumption)	USD 5.1M (60% growth assumption)
Gross Margin	68%	72%	76%
Monthly Burn	USD 150K	USD 280K	USD 380K
Cash Runway	14 months	24 months post-close	18 months
Pipeline	12 clients	7 qualified opportunities in active contract negotiation	Target 25 clients

Holder	Ownership Post-Series A
Co-founders (three)	57.6%
Seed investors	14.4%
Employee option pool	8.0%
Meridian Ventures Fund I	20.0%

Percentile	Equity Value	Gross MOIC on USD 8M	IC Assessment
P5 Severe downside	USD 4.2M	0.5x	Below IC minimum threshold
P10 IC threshold	USD 12.4M	1.6x	Pass exceeds USD 8M investment
P25	USD 19.8M	2.5x	Pass
P50 Base case	USD 31.8M	4.0x	Pass IC primary reference
P75	USD 48.3M	6.0x	Pass
P90 Upside	USD 68.5M	8.6x	Pass

Expanded NPV Component	Value
Static NPV at P50	USD 23.8M (P50 equity value USD 31.8M minus USD 8M invested)
Compound option value for Series B participation (probability 0.75, option value USD 3.5M)	USD 2.6M
Abandonment option value (secondary market liquidity at discount to fair value)	USD 0.5M
Expanded NPV total	USD 26.9M

Five-Dimension Due Diligence Assessment

Dimension	Assessment	Key Finding
Business Model	Pass	ARR USD 1.8M. NRR 118%. CAC payback 3.6 months. Gross margin trajectory confirmed to 78 to 82% at scale. Cohort analysis shows zero churn and 23% ACV expansion at renewal.
Team Execution	Pass	Founders from DBS and Credit Suisse. 18 of 22 staff retained. Milestones met on or ahead of schedule. Four independent client references confirmed product quality and implementation reliability.
Market	Pass with flag	Core TAM USD 54M, below USD 1B target profile threshold. Flag: adjacent segments required to reach USD 500M+ TAM. Monitoring condition: roadmap presentation within six months of close.
Financial	Pass	Clean cap table. Revenue recognition consistent with SaaS standards. No related party transactions. Cash position independently verified. Financial model growth assumptions supported by active pipeline of seven qualified opportunities.
Strategic Fit	Pass	High co-investment suitability. 85 eligible VHNW and UHNW clients with relevant sector knowledge across Singapore and China corridors. Direct private banking intelligence value from a portfolio company serving the same institutions.

Strategic Fit with Meridian Private Bank

Integration Layer	Mechanism	Value Created
Deal sourcing	CEO network from DBS and Credit Suisse spans Singapore and Hong Kong private banking operations.	Proprietary sourcing advantage within wealthtech sector for future Fund I positions at no incremental cost.
Co-investment distribution	Offer to 85 eligible VHNW and UHNW clients within 30 days of close. Maximum tranche USD 1.6M.	Converts venture deal access into AUM relationship deepening. Minimum ticket USD 250K compatible with VHNW tier capacity.
Private banking intelligence	Portfolio company serves the same institutions where Meridian operates.	Continuous ground-level intelligence on operational technology adoption, competitor product performance, and institutional client priorities.
Client engagement quality	UHNW clients with institutional financial services backgrounds evaluate the deal independently.	Higher co-investment engagement quality. Lower CKA friction than sector-agnostic venture deals.

IC Recommendation and Decision

IC Threshold		Required	ArcWealth	Status
P10 equity value above initial investment		Above USD 8M	USD 12.4M	Pass
P50 gross MOIC		Above 2.5x	4.0x	Pass
